一、阅读题型总览与通用解题方法

1. 三大题型考点与分值

题型	题量/分值	考什么	答题顺序
A 选词填空	10题 / 35.5分	词性判断+词义+固定搭配	最后做

C 仔细阅读	10题 / 142分	细节/推断/主旨/词义+同义替换	其次做

建议 40 分钟内：B 约10min → C 约22min → A 约8min。

2. 干扰项四大套路

① 偷换概念（选项改换主体/对象） ② 无中生有（原文没提的信息） ③ 绝对化（only/all/never/always 慎选） ④ 过度推断（“可能”被说成“必然”）

3. 通用技巧口诀

选词填空：先判词性→看搭配→已用划掉。

段落匹配：题干划实词→回段扫→人名/数字秒定位→同义替换。

仔细阅读：读题干划名词→定位那一两句→答案=同义替换，排除看套路。

4. 读不懂是单词还是语法？

表现	诊断	主攻
一句≥2-3个生词就读不懂	单词（主因）	先背词
词都认识仍抓不住结构	语法（次因）	练主干→修饰拆句
都懂却选错	技巧	回看本题精讲

5. 高频同义替换规律库

二、真题题路精讲（逐题）

1. 选词填空（Q26-35）

原文中每个空号后面附一个手写框：先标注你判断的词性（n. / v. / adj. / adv. 等），再在下方做选词。

Psychologists have long been interested in how we construct our identities and the sorts of strategies that we use to present ourselves in society. New findings suggest that the kinds of 26 and strategic self- presentation behaviour we see in adults appear at a much younger age than 27 known.

Research shows that a child's awareness of social standing comes from adults. Like grown-ups, kids want to be 28 by those they admire.

Interactive experiences may provide opportunities for children to learn about what 29 a desirable reputation and the kinds of strategies that are

Five-year-olds aren't just aware of their reputations, they also behave strategically to alter their outward image. They will 31 their behaviour in order to appear moral or socially good in the eyes of key observers. While we know that adults use a large variety of attributes to manage and create impressions, we don't yet know whether children 32 and use the fact that different attributes are valuable at different times to different 33 . It's important for us to further consider where in this process children succeed in controlling their reputation and where they 34 .

A question to think about is, "What happens even earlier than age five?" Children don't just show up to the first day of kindergarten and have the idea of reputation pop 35 into existence. The logical question to ask is, "What happens even earlier?"

 **匹配题“画关键词”原则（先看这里）**

- 先题干、后原文：**逐条读 10 个陈述句，在题干上划词，不要先通读文章。
- 优先划定位性最强的词：**专有名词（人名/机构/地名）、数字/年代/百分比、大写与引号词——唯一性强，回文秒定位。
- 其次划：**名词/名词短语（找“话题”）、动词/形容词（态度与变化）、限定词（only/all/most/first/never...，常是题眼）。
- 少而精：**每条划 2-4 个实词；不划 the/of/and 等虚词，也不划 people/study/author/passage 等通用词。
- 预判改写：**数字/专名少变；普通词易同义替换（purchase→buy；due to→because of），划词时就想“它会长什么样”。
- 复核：**一段可对应多题；定位后必须确认“题干 ⇌ 原句”构成同义替换，避免只碰上一个词就选。

3. 仔细阅读 Passage One（Q46-50，熊猫“太舒服”反不利）

New research suggests that pandas may be at risk of dying out because they are too comfortable. Experts say too much happiness can stop the bears from searching for new mates.

Environmentalists have long believed that building roads or homes near the bears may threaten their survival by “reducing or fragmenting their natural habitats”, The Times reported. But the new research suggests that a “modest degree of discomfort and fragmentation” may actually help preserve panda populations.

The research was conducted by scientists from Michigan State University. It concluded that pandas fail to wander off in search of new mates if they find their habitat too comfortable, resulting in a lack of vital genetic diversity.

For their study — outlined in a paper in the journal Conservation Biology — the team looked at genetic diversity and spread among a Chinese panda population. The ideal level of perfectly livable habitat was found to be only 80% of an area, with the remainder either too harsh or too affected by human activity.

The experts concluded that pandas should ideally “be happy enough to thrive, but not so content that they don’t want to move around and find new mates”. Their conclusions about what The Guardian described as this “sweet spot” are in line with the so-called Goldilocks principle: that there can be just the right amount of something. The concept has been applied to a wide range of disciplines, from developmental psychology to economics and engineering.

Claudio Sillero, a professor of conservation biology at Oxford University, told the newspaper that the new findings could have implications beyond panda conservation.

“Most large animals that eat meat live in increasingly fragmented landscapes,” said Sillero, who was not involved in the research. “It may well be that the messy nature of their relationship with human efforts induces more animals to scatter or travel further, and might result in greater genetic connectivity and enhanced population persistence.”

The most recent count of pandas found that there were more than 1,800 left in the wild, putting them on the list of vulnerable, but not endangered, species.

46. What do we learn from new research about pandas?
- They are losing habitat due to the building of roads and houses.
 - They have stopped seeking new mates for reproduction.
 - They may not adapt to the fragmentation of their habitat.
 - They may cease to exist as a result of enjoying too good a life.

4. 仔细阅读 Passage Two (Q51-55, Grit 毅力比天赋重要)

With those born with natural talents, it feels as if they excel without really trying. But what about those of us who don't have a natural talent? We've been told all our lives that if you work hard, you too can succeed. But with the release of Angela Duckworth's Grit, we are given a new key to success.

"As much as talent counts, effort counts twice," says Duckworth in Grit. She introduces a new concept that talent may be overrated, and if you want real success, what you need is grit, the perfect combination of passion and persistence. Even if you have natural talent, it's nothing without grit.

Duckworth says grit is the difference between success and failure. A person who has grit is more likely to succeed than a person who does not. When we think about attaining success — whether it's landing that job or learning that new skill — our thoughts are immediately burdened by all the things we must first learn. If you want that new job, you have to learn the job skills, then the interview skills, then the dress part — and you must be perfect at all of them. Grit is different because it tells us that perfection isn't the goal.

Grit lifts the unreasonable expectations off our shoulders. Grit tells us that the door is open wider than we first thought possible. Grit allows us to redefine our goals. Think about it: what's something you've always wanted to do, but gave up because you "don't have the skills for it"? What's something you love but aren't good at?

The real workings of grit are to have sustainable passion and continue to try. Effort means more than your natural ability. Even if you haven't mastered a skill, grit tells you that you can still succeed if you can transform your passion into action. In a way, Duckworth is giving new hope to people who have shut the doors on their dreams. She is saying it is possible that you can accomplish anything. If at first you fail, then try one more time with grit.

51. What does the passage say about people born with natural talents?

- They seem to outdo others without hard work.
- They appear to know all the secrets to success.
- They feel it only too logical to succeed.

第四步 逐句写成文

Dear sir or madam,

I believe developing cross-cultural communication ability is of great importance for college students, and we can improve it through practice and open-mindedness.

First and foremost, improving our language skills is the foundation of cross-cultural communication: joining English corners or taking communication courses helps us speak clearly and confidently.

In addition, taking part in exchange programmes or online international partnerships lets us learn about other cultures directly and see the world from different perspectives.

What's more, campus activities such as culture festivals, foreign-film nights and speech contests give us real chances to communicate with people from other backgrounds.

In conclusion, with continuous practice and an open attitude, our cross-cultural communication ability will be greatly improved.

Yours sincerely,

Li Ming

第五步 检查
